

## NEWEA 2022 WEBINAR SERIES

# I/A SEPTIC SYSTEMS (OWTS) FUNDING AND FINANCING

**Tuesday  
May 3, 2022  
8:30 – 11:00 AM**

Registration is open to the public and is now available at [https://newea.force.com/MN4\\_\\_PublicEventRegistration?id=a0X6S00000sHREyUAO](https://newea.force.com/MN4__PublicEventRegistration?id=a0X6S00000sHREyUAO).

No education credits will be awarded for attending this event.

The two biggest issues for permitting and adoption of the new generation of Enhanced I/A septic systems (OWTS) are management (RME) and funding. The former was addressed at a charrette held at the NEWEA Annual Conference in January. See a [readout](#) of that event.

Funding and financing will be addressed via this Zoom webinar. We will focus on three areas of need:

1. Moving promising technologies through the permitting process
2. Standing-up a pilot RME
3. High-volume consumer adoption

There will be presentations with Q&A from State Revolving Fund (SRF), Federal and private investor perspectives.

Speakers are expected to include:

- Maria Pinaud, MassDEP, Municipal Services, Director
- Nate Keenan, Mass Clean Water Trust, Deputy Director
- Zach Lowenstein, US EPA, Office of Wastewater Management, Decentralized Wastewater Program Manager
- Ian Dombroski, US EPA, Region 1, Southeast New England Program Coordinator
- Jason Lee, Quantified Ventures, Director
